

Lusaka, Zambia

Supplemental documents needed for CR2/IR2 cases

- The original or certified true copy of the “birth record” issued by the hospital or clinic where the child was born. NOTE: If this hospital birth record was submitted to obtain an official Zambian birth certificate, the child’s guardian in Zambia will need to contact the Registrar General to request the original document and bring it to the child’s interview at the US Embassy.
- “Under 5 card” – the record of immunizations and medical check-ups that clinics and hospitals typically give new mothers.
